XOP Networks Universal Service Node (USN) and other products are deployed in Carrier and Enterprise networks. In such networks our products interface with a variety of network elements.

The Figure below shows a pictorial of a typical USN deployment with Release 5.0.

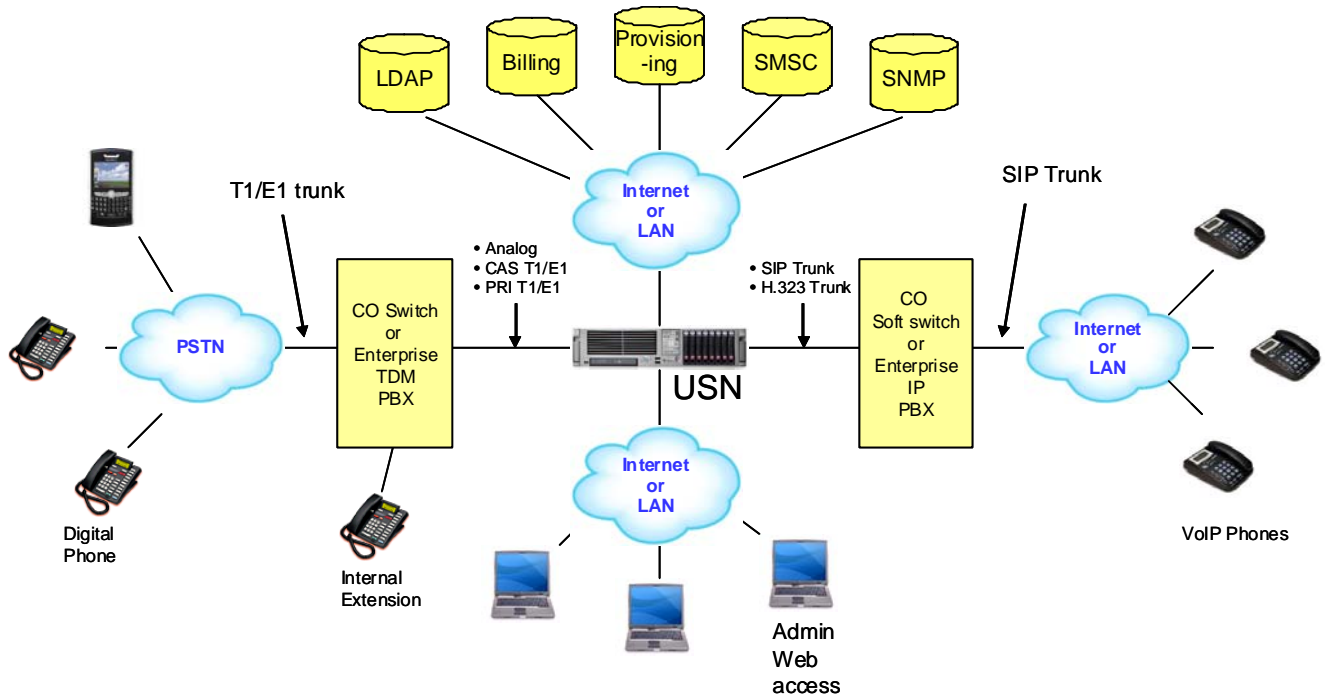

Figure 1.0 – USN Network Deployment

The table below provides a list of various Central Office Switches, Soft Switches, PBXs, Hybrid/IP PBXs and other peripheral network elements with whom our products have proven interoperability in the field.
