

High Availability Data Sheet

The XOP Networks **High Availability** feature allows your service to survive failure conditions.

Add one or more **fully redundant** media processing servers to your network.

- Provide "Five Nines" availability for your USN services.
- Provide geographic redundancy.

Key Features and Benefits

Feature	Benefit
Full database replication	Immediate availability to run any service even if a server is down
Geographic distribution	Survive an outage of an entire data center
Unlimited redundancy	Double, triple, or more levels of redundancy
Load sharing	Use your network assets more cost effectively

Sample Use Cases

- **Conferencing**
 - Callers can automatically meet on an alternate server if the primary server is unavailable.
- **Mass Notification**
 - Mass Notification can be sent from an alternate server if the primary server is unavailable.
- **Disaster Recovery**
 - In the event of a local disaster, immediately use a geographically separate location to run your services.
