SNMP Data Sheet

The XOP Networks **SNMP** feature allows your company's Network Manager and Syslog server to monitor the XOP system.

- Query your system's health.

- Receive Syslog System Event messages from your system.

- Be alerted when your system reboots.

Key Features and Benefits

Feature	Benefit
SNMP Agent	Take action before any problems occur.
Syslog Client	Be aware of hacking attempts and other application changes, such as call failures.
System Restart Notifier	Be aware when your system reboots (for example, after a power outage).

Sample Use Cases

- **Application Health Monitoring**

  - *Monitor the health of the operating system and appliction components and take action before your users experience any problems.*

- **System Event Logging**

  - *Monitor application-level events on your Syslog server. Be aware of events such as hacking attempts and failed calls.*

- **System Boot Notfication**

  - *Receive multi-modal notification if your system reboots. Notfication can be sent via phone call, email, or text message.*
